### Tools:

Pipe Wrench

Teflon Tape

Rags

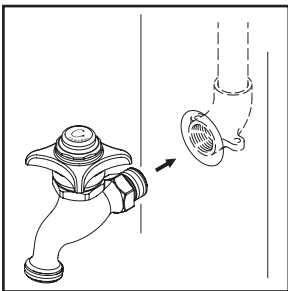

## Model Number: 0031, 0033 Series

### Warnings and Notes:

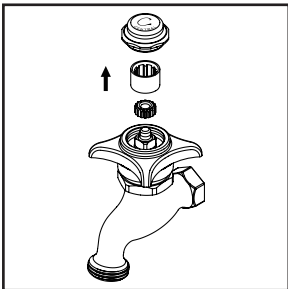

Check with local plumbing code requirements before installation.  
This product should be installed by a local listed plumber.  
**Do not use plumbers putty on threads.**

### Installation Steps:

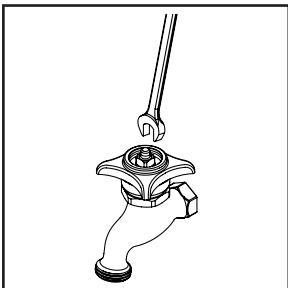

Self-Close Wallmount Faucet

(1) Apply Teflon tape on the inlet thread end of the faucet, thread in and secure the faucet to the elbow with the help of pipe wrench.

(2) The self-close basin faucet was preset @60 PSI to shut off water, different water pressure might affect the faucet and cause it not to function properly, if need be, remove the handle cap, sleeve and Celcon Samson nut.

(3) Use wrench to adjust brass square nut, turn counterclockwise to tighten the cartridge and turn it clockwise to loosen the cartridge until the faucet functions properly then proceed to tighten the cartridge 90° more before reassembling the Celcon Samson nut, sleeve, and handle cap back in place.
